## Product Lead-Times Reference Guide: Jul 16th, 2014 – Aug 13th, 2014

Published Lead Time represents the current estimated total time to receive and build a customer order ready to ship for the majority of orders within a specified product category, based on lead time history and current trends. **Exceptions to standard orders such as Engineered Specials, Master Keyed products, special finishes, etc. are noted as additions to the standard lead time under the “Exceptions” column.** Product issues causing delivery holds are also noted in the “Exceptions” column. Weeks shown are in calendar weeks from receipt of order. Sales order acknowledgements will typically be transmitted 1-3 days after receipt of order and specify shipping location. A shipping destination legend has been added at the end of this report to indicate typical shipping times for standard, non-expedited orders, based on shipping location and requested destination. Specific order dates could be extended beyond published lead-times depending on larger quantities, exceptions noted, infrequently ordered products, and incoming order rates. **Please review order acknowledgements so that any issues can be addressed as soon as possible.** Please specify required ship date on purchase order, as required. For specific inquiries, please contact Commercial Customer Care at 877-671-7011.

### Commercial and Residential Products

| Brand   | Default Shipping Location | Product Series   | Published Lead Time (Weeks) | Exceptions   |
